PROFESSIONAL SUMMARY

AI Engineer with hands-on experience building LLM-powered applications, including **agentic workflows** and **retrieval-augmented generation (RAG) systems**. Skilled in **LangChain** and **LangGraph**, with a focus on **evaluation**, **prompt optimization**, and **retrieval performance**. Demonstrated ability to **improve system accuracy** and **reduce latency** through iterative experimentation. Seeking full-time AI Engineer or GenAI Engineer opportunities.

TECHNICAL SKILLS

Programming: Python, SQL

Frameworks & Libraries: LangChain, LangGraph, FastAPI, Streamlit, Hugging Face Transformers

LLM & GenAI: OpenAI API, Groq, Sentence-Transformers, RAG Pipelines, Prompt Engineering

Retrieval & Search: BM25, Dense Retrieval, Hybrid Search (RRF), Reranking (Cross-Encoders)

Vector Databases: Qdrant, Pinecone, ChromaDB

Tools & Platforms: Git, GitHub, Docker, VS Code, PyCharm, Google Colab

Deployment: Render, Railway

PROJECTS

InsightForge — AI Research Agent

LangGraph · OpenAI API · Streamlit

- Built an autonomous research agent using **LangGraph** with **query decomposition**, **parallel web search**, and **iterative self-reflection**.
- Implemented **ranking**, **caching**, and **depth-controlled workflows** to reduce redundant LLM calls and improve response consistency.
- Developed a UI with inline citations and export support (PDF/Markdown) for structured outputs.

EvidentAI — RAG System with Evaluation & Monitoring

LangChain · OpenAI API · Qdrant · BM25 · Reranker · LangSmith · Streamlit

- Developed an end-to-end **RAG pipeline** with document ingestion, chunking, **hybrid retrieval**, reranking, and answer generation.
- Reduced **latency** from **43s** → **8s (~81% improvement)** by optimizing prompting and replacing heavy components.
- Improved evaluation score from 0.54 to 0.98 using reranking and prompt optimization, validated on a 50-question benchmark dataset derived from Anthropic's Constitutional AI principles.
- Integrated **LangSmith** for **tracing** and debugging retrieval and generation failures.
- Built a **CI/CD evaluation** pipeline that rejects builds when score falls below **0.80**, enforcing quality thresholds.

EDUCATION

B.Sc. in Information Technology, Thakur Shyamnarayan Degree College, University of Mumbai

2023 – June 2026 | CGPI: 8.68

HSC (Commerce), Thakur College of Science and Commerce, Maharashtra Board

2021 – 2023 | 69.33%

SSC (ICSE), RBK School, Mira Road

2021 | 82%

ACHIEVEMENTS

Gold Medalist at the National Karate Championship, representing Maharashtra.

CERTIFICATES

AI Fluency, Anthropic (March 2026)
